

Multi-Purpose Gear Lube

Formulated with Lubium® II

SWEPCO 201 Multi-Purpose Gear Lube is a high performance single weight gear oil formulated to deliver superior performance in a wide range of mobile and industrial gearbox applications. SWEPCO's premium base stocks, proprietary Lubium® // anti-oxidation/anticorrosion package and other advanced additive chemistry provide costefficient extended drain protection from wear, foaming, overheating, deposits, rust and water contamination. If you want to insure maximum performance and gearbox life in a wide range of applications, choose SWEPCO 201 Multi-Purpose Gear Lube.

KEY BENEFITS

- Long-drain protection for manual transmissions, industrial gearboxes, gear reducers, gear driven final drives, power take offs and differentials
- Lubium® II enhances thermal stability & insures proper viscosity at high temperatures
- Adhesive/cohesive additive helps eliminate start-up wear
- Controls foaming; lowers operating temperatures
- Rapid, complete water separation for easy removal
- Extends oil life as much as two to three times or more
- Helps improve fuel economy in over-the-road equipment
- Reduces energy consumption in stationary equipment
- Superior control of deposits, varnish, corrosion, sludge, rust
- Exceeds performance requirements of all major gearbox specifications and most OEMs
- Meets and exceeds API GL-5 and MT-1

Cost-Effective, Long Drain Protection for Mobile & Industrial Gear Boxes

Mining

201.

Enjoy better performance, longer drains & maximum gearbox life with SWEPCO

Construction

Agriculture

Feature	Benefit			
High VI Base Stock Blends	 Gives you a more uniform viscosity over a wide temperature range Helps improve high temperature oxidation and thermal stability Better low temperature flow characteristics help reduce start-up wear Extends service life 			
LUBIUM® II	Dramatically enhances oxidation and corrosion resistance			
Oxidation Inhibitor	Reduces oil thickeningHelps prevent sludge, varnish and carbon deposits that result from oxidation			
Rust & Corrosion Inhibitor	 Builds a chemical bond with the surface to keep moisture and acids from penetrating and attacking surfaces 			
Adhesive/Cohesive Additive	 Enables the oil to climb when it's cold to eliminat start up wear Reverts to the splash system when the gear box reaches operating temperatures 			
Anti-Foam Additive	• Can lower oil temperatures by 25 - 50° F by dispersing foam, releasing trapped heat			
Oiliness Additive	Enables the oil to penetrate the surface for better lubrication			
Anti-Wear Additive	Helps prevent metal to metal contact, friction and wear			
Demulsifier Additive	Promotes rapid water separation and easy water drain off after shut down			
Pour Point Depressant Additive	Gives the oil better low temperature flow characteristicsHelps to reduce low temperature start-up wear			
Viscosity Index Improver Additive	Less high temperature thinning and low temperature thickening			
Limited Slip Differential Additive	Insures proper frictional characteristics to eliminate chatter, shudder			
Saves Energy	 Increased "oiliness" provides friction reducing film on vital metal parts to reduce power usage by as much as 30% 			
Long Life	Drain cycles 2-3 times longer than conventional oils reduce waste oil disposal			
Multi-Purpose Formulation	Reduces inventory and lubrication errors to save you money			
Lab Tec [™] Fluid Analysis Program	 Maximizes equipment and lubricant life and pinpoints impending problems Reduces waste 			

Typical Physical Properties (All viscosity grades not available in all markets)

SAE Gear Oil Grade	80W90	90		140		250
ISO Viscosity Grade	150	220	320	460	680	1000
AGMA	4 EP	5 EP	6 EP	7 EP	8 EP	8a EP
Density @ 60°F lbs/gal (kg/l)	7.39 (0.895)	7.40 (0.899)	7.45 (0.902)	. 7.50 (0.907)	7.60 (0.917)	7.70 (0.923)
Flash Point COC, °F (°C)	400 (204)	405 (207)	415 (213)	560 (293)	560 (293)	560 (293)
Pour Point, °F (°C)	15 (-26)	12 (-24)	0 (-18)	5 (-15)	15 (-10)	18 (-8)
Viscosity, 40°C, cSt	160	223	316	470	680	1010
